PLEASE NOTE: This document file consists of ongoing research notes on the stated topic. This may or may not be all the information that I have on this topic. The information herein should not be considered authoritative nor a final summary of the topic. These notes are provided for whatever usefulness may be obtained from the information.

TOPIC:

The daguerreian activities of H. Whittemore.

This a collection of research notes regarding H. Whittemore, a daguerreotypist working in New York, the Caribbean, South America. This is continuing, active research and this file may be revised at any time. Additional information is in file.

From Robert Hunt, *Photography: a Treatise on the Chemical Changes produced by Solar Radiation, and the Production of Pictures from Nature, by the Daguerreotype Calotype, and Other Photographic Processes. With Additions by the American Editor* [Samuel Dwight Humphrey—edit.] (New York: S. D. Humphrey, 1852): 257.

CHAPTER XXI.

VIEWS BY THE DAGUERREOTYPE PROCESS.

DAGUERREOTYPE views are at present commanding much attention in this country. Their interest is not confined to the operator alone, but the public appreciate the unequalled pencillings of nature. This department of the Daguerreotype art owes much to the well-known Artists, Southworth & Hawes, of Boston. These gentlemen have carried on their experiments with a very marked and important success. H. Whittemore, a gentleman who has travelled over most of South as well as North America, has probably made the most valuable collection of views ever produced in this country. His collection presents a map of paramount interest. I saw a single view of the Falls of Niagara, which surpassed anything of the kind that has ever been presented before me; the harmony of tone, the exquisite mellowness and faithful delineations, were unsurpassed, while the whole effect presented a charm rarely attending a Daguerreotype view. Mr. W. produced his views with a common mirror for a reflector.

I must not overlook the large collection of views taken by Mr. Vance, of California. He has over three hundred on whole plates. They are of one state, and consequently do

not present such general interest as those by Mr. Whittemore; yet they are a larger collection, and exhibit great skill and perseverance in the operator.

"Premiums Awarded by the Managers of the Twenty-Fourth Annual Fair of the American Institute, October, 1852," *Documents of the Assembly of the State of New-York, Seventy-Fifth Session, 1852* (Albany: C. Van Benthuyesen, 1852): 595, 610, 618-19. The list appears under the header, "Manufacturing and Mechanical Department." (volume available from *Google Books*.) The same text is also provided in *Transactions of the American Institute of the City of New-York for 1851* (Albany: Charles Van Benthuyesen, 1852): 618-19.
